HMDA Dataset Filtering - Available Filters

Geography Filters

Nationwide

- **Description:** Select this option to download the national loan-level dataset. This is a large dataset (5.8 GB) and will take time to download. It will not be able to be opened in standard applications. If using a standard application, adding pre-selected filters will narrow down the dataset with your preferred parameters and minimize the file size.

State

- **Description:** Select this option to download datasets by state, including the District of Columbia and Puerto Rico.

MSA/MD

- **Description:** Select this option to download datasets by the 5 digit derived MSA (metropolitan statistical area) or MD (metropolitan division) code. A MSA/MD is an area that has at least one urbanized area of 50,000 or more population.

County

- **Description:** Select this option to download datasets by county.

Financial Institution Filter

- **Description:** Select one or more financial institution by entering the financial institutions LEI or name
